### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Kotab on 5/3/2005.

The application has been amended as follows:

#### **IN THE SPECIFICATION**

As per abstract, after the phrase "a common voltage potential." as described in line 16, delete the phrase "In a first embodiment...the second gap layer." as described from line 16 to line 26.

After the title of the invention on Page 1 of the specification, insert a new line as -  
-This is a division of application Serial No. 09/753,804 filed 01/02/2001, now US PAT.  
6,678,127--.

#### **IN THE CLAIM**

Re. Claim 1: After the phrase "A method of making" as recited in line 1, insert the phrase of --a read head assembly--.

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention such as a first and second read gap layers located between a first and second shield layers and the first read gap layer

Art Unit: 3729

having a resistance  $R_{G1}$  between the first shield layer and one of the first and second lead layers and the second read gap having a resistance  $R_{G2}$  between the second shield layer and said one of the first and second lead layers and a connection is provided via a plurality of resistors between a first node and each of the first and second shield layers wherein the plurality of resistors includes at least first and second resistors  $R_{s1}$  and  $R_{s2}$  and the first node is connected to said one of the first and second lead layers and a second node is located between the first and second resistors  $R_{s1}$  and  $R_{s2}$  and then connecting first and second inputs of an operational amplifier to the first and second nodes respectively so as to be across the first resistor  $R_{s1}$  and connecting an output of the operational amplifier to the second node for maintaining the first and second nodes at a common voltage potential. It is not obvious taken alone or in combination of other references fairly to suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul D Kim whose telephone number is 571-272-4565. The examiner can normally be reached on Monday-Friday between 8:00 AM to 4:00 PM.
